JavaScript, ObjectiveC

education

2012–2015	**Masters** of Computer Science	The University of Milan
	Specialization in Computer Science	
2007–2012	**Bachelor** of Computer Science	The University of Milan
	Face-2-face contacts detection on Android platform	
	This thesis explored the concept of short range contact detection through a small Bluetooth framework developed for Android powered devices.	

experience

Full Time

02/15–Now **Jamendo** Legnano, Italy
Freelance Developer
After the experience in Luxembourg I'm still collaborating with Jamendo on different solo projects. I've mainly worked on their Android app, rewriting 90% of it to integrate a totally new design, then following the post-release bugfixing. In addition to that I've also handled the upgrade of Jamendo Lua plugin for VLC, and a couple Python project that required a full knowledge of the Jamendo ecosystem.
Detailed achievements:
  • Learned to organize remote work

11/14–01/15 **Jamendo** Luxembourg City, Luxembourg
Web & Mobile Developer
My duties during my short-term contract at Jamendo were really heterogeneous. I worked on a bunch of Python backend tasks, a couple of web pages used by the music team and a partial UI refactoring (a more "iOS friendly" design also supporting iPad) and bugfixing of the Jamendo iOS app.
Detailed achievements:
  • Gained a basic knowledge of Zend Framework and backboneJS

04/14–10/14 **Jamendo** Luxembourg City, Luxembourg
Internship as Data Analyst
At Jamendo I worked on the Python backend, firstly integrating the Amazon Mechanical Turk crowdsourcing platform into the tag analysis tasks, then refactoring these tasks to be compatible with the new database architecture. This procedure allowed me to deeply analyze the tagging system, fixing some bugs and improving the overall performances.
Detailed achievements:
  • Learned how to work in team
  • Worked on huge dataset
  • Dealt with complex server ecosystem

Part Time

2011–2012	**Internet Utile ADV**	Rescaldina, Italy

Web Developer
Supported the creation of dynamic websites in terms of database design and frontend & backend development.
Detailed achievements:
- Designed small databases
- First approach with web technologies like phpMyAdmin and jQuery

skills

advanced: Java for Android, Python, Java, MySQL, Bash, LATEX **intermediate:** Subversion, git, Debian, Mac OS X, jQuery, CSS **basic:** Vagrant, Docker, ObjectiveC, AspectJ, Oracle Database

interests

professional: mobile development, data analysis, scripting, design pattern **personal:** b-boying, motorbike, sailing
